Man, Wife And Infant Rescued By Salvation Army.

New York.-John R. Bryant and his wife, who with their 10-month-old baby were found destitute in a railway terminal here, are under arrest in Somerville, N. J., as fugitive from justice at the request of the authori ties in Orlando, Fla.

Police headquarters here received telegram from the Sheriff at Orlando requesting the arrest of the couple "for murder of father."

Bryant, his wife and baby were found by a Salvation Army worker aft er spending two days penniless and without food in the railway terminal. Lodging was provided for them until work was obtained for the man on a farm near New Brunswick, N. J. where they were taken into custody.

# BILL TO BAN

New Measure Would Prohibit tion. **Doctors Prescribing It** 

Takes New Fling At Liquor-Proposes Limiting Of Importation And Manufacture To Actual Requirements.

Washington.—As the first step of the fight in Congress to tighten up the Volstead prohibition law a bill deigned to prohibit the sale of beer to the sick on a doctor's prescription was introduced in the House by Chairman

Volstead of the Judiciary Committee. The measure would not prohibit use of wine for medicinal purposes, but would make more specific and string-

ent the regulations on this subject. Frankly declaring there was no real necessity for beer as a medicine Mr. Volstead announced that his bill, described as supplemental to national prohibition act, was put forward at this time to meet the situation created by the opinion of former Attorney General Palmer that beer and wine, under the Volstead Act, could be prescribed for the ailing.

In tentative regulations announced a few days ago by Prohibition Commissioner Kramer, but which must new Commissioner, an arbitrary limit of 47-8 gallons of beer and three gallons of wine was fixed as the maximum that might be prescribed by a mer had ruled that the law fixed no

Regardless of what Commissione.

Blair may rule, Mr. Volstead indicated that the prohibition forces in the which was occupied by Italy, with an increase of 195,797 in the ten beinging her total to 1,139,578. know that there will be no beer. The bill will be referred to Mr. Volstead's committee for hearing and report. sage was certain.

After turning thumbs down on beer 000,000 gallons now in bonded warehouses has been exhausted. Mr. Volstead declared there was no sense 10,099. in allowing large quantities to be imported or manufactured while there

The bill also would impose certain additional restrictions on the manufacture of alcoholic preparations 'masquerading" as medicine and ton ics, which prohibition leaders assert are drinkable. In support of this provision Mr. Volstead said the bootieg trade was being supplied through withdrawals ostensibly for the manufacture of these products.

TRAIN SMASHES STATION.

Six Cars Containing 75 Passengers Ditched.

Corning, N. Y .- The railway station at Erwin, N. Y., a short distance from here, was completely demolished when a fast Erie Railroad passenger train from Cleveland to New York crashed through it. Only one man, John J Delaney, a baggageman, of Buffalo was injured. A spreading rail was be lieved to have caused the wreck, which ditched six cars containing 75 pas

WILD HORSE KILLS CHILD.

Leaves Race Track And Dashes Into Crowd Of Spectators.

Pitcher, Okla.-A 5-year-old girl was killed and five persons were injured, two seriously, when a race horse dashed through a race-track \$5,000,000 fence into a crowd of spectators. Two Lemberg by the police authorities, who horses were entered in the race, and discovered a counterfeiting plant in the one that plunged into the crowd full operation. A man named Simon left the track within 20 yards of the Lisner and his wife and Lisner's sister wire. The jockey was one of the in- in-law and her husband have been ar

War Exodus Reflected in Census Bureau Statistics

DECLINE NEARLY 2,000,000

Italians And Poles Jump-The Former Register Gain Of 264,333 For Decade And Latter 195.797.

Washington.—Russia, Austria, Ireland and Germany, natives of which made up more than 59 per cent. of the country's total foreign-born population ten years ago, showed heavy losses in the number of their natives in the United States during the last ten years Census Bureau statistics show. These losses aggregated almost two million and are believed to have been due largely to the World War, with its consequent exodus of belligerent nationals, and the stoppage of immigra-

German-born showed a loss of 818, 035, Austrian-born a loss of 600,014, Irish-born a loss of 316,571 and Russian-born a loss of 203,783. While AIMED AT PALMER OPINION Germany had the largest loss numerically, Austria's loss was relatively the largest, having been more than 50 per

> Notwithstanding these heavy losses, the country's total foreign-born population, as just announced by the Bureau of Census in a preliminary statement prepared for the early use of Congress, showed an increase of 358, 442, of 2.6 per cent., the total number of foreign-born being 13,703,987. The increase is believed to have been the smallest, both in number and percent age, ever recorded for any decade. In the previous decade, 1900-10, the increase was 3,174,610, or 20.7 per cent.

Germany led as the country of birth of the foreign-born in the United States 10 years ago with a total of more than 2,500,000 and still leads, although the number was reduced to 1,683,298, a decrease of 818,035. The number of natives of Germany have continued to show a loss each decade since 1890, but the last decade's decrease was the largest ever shown.

The standing of other countries in the foreign-born population of the United States has changed somewhat from 10 years ago. Italy has taken second place from Russia with an increase of 264,333 in the ten years, compared await approval by David H. Blair, the with an increase of 859,000 in the previous decade and a total for 1920 of 1,607,458.

Russia has taken third place from Ireland, but showed a decrease of physician at any one time. Mr. Pal. 203,783, compared with an increase of about 1,000,000 in the decade 1900-10. Natives of Russia in the United States number 1,398,999.

Ireland, which has shown decreases in each decade since 1890, had a larger decrease during the last Members opposed to any modification decade than in any previous one, the of the dry law said it probably would loss having been 316,571, compared be reported to the House, substantially with a decrease of 263,208 for 1900as drawn. There were predictions 10. The total number of Irish-born from many dry quarters that its pas- in the United States in 1920 was 1,-035,680, ranking that country fifth.

Canada showed a decrease of \$7.501 and putting extra safeguards around in the ten years, compared with an the medical use of wine, home-made increase of 27,000 the previous decade, or imported, the new Volstead bill and dropped from fifth to sixth place. would close the gates to importation Total Canadians number 1,117,136. of liquor and shut down distilleries French Canadians numbered 307,681 until the present stock of about 49, and showed a loss of 77,402 in the ten years, while other Canadians numbered 809,455 and showed a loss of

Persons born in England numbered 812.414, which was a decrease of 65,305 in the ten years, compared with an increase of 37,000 the previous ten vears. England ranked seventh, which place she held ten years ago.

Sweden continued to hold eighth place with a total of 624,759. That was a decrease of 40,448 in the ten years, compared with an increase of 83,000 the previous decade.

Austria, with the second largest nunerical loss of any country during the ten years, dropped into ninth place from the sixth position. The decrease in the number of her natives in the United States was 600,014, compared with an increase of 683,000 during the previous decade. Austria's total natives in the United States numbered 574,959.

# The Voice of the Pack

**By EDISON MARSHALL** 

CHAPTER II-Continued.

"Father and I are to stay here-?" What else can you do?" He went back to his traces and drew the sled didn't know why. It had its fount in 100 yards farther. He didn't seem to see the gaunt wolf that backed off into the shadows as he approached. He refused to notice that the pack seemed to be steadily growing bolder. Human hunters usually had guns that could blast and destroy from a distance; but even an animal intelligence could perceive that these three emed to be without this means of inflicting death.

A wolf is ever so much more intelligent than a crow—yet a crow shows little fear of an unarmed man and is wholly unapproachable by a boy with a gun. The ugly truth was simply that in their increasing madness and exritement and hunger, they were becoming less and less fearful of these three strange humans with the sled.

It was not a good place for a camp. cleared a little patch of ground of its snow mantle. Dan cut a number of saplings-laboriously with his ax-and built a fire with the comparatively dry core of a dead tree. True, it was feeble and flickering, but as good as could be hoped for, considering the difficulties under which he worked.

The dead logs under the snow were soaked with water from the rains and thaws. The green wood that he cut smoked without blazing.

"No more time to be lost," Dan told Snowbird. "It lies in your hands to keep the fire burning. And don't leave circle of the fire light without that pistol in your hand."

"You don't mean," she asked, unbe lieving, "that you are going to go out there to fight Cranston—unarmed?" "Of course, Snowbird. You must

keep the pistol."
"But it means death; that's all it What chance would you have against a man with a rifle? And as soon as you get away from this fire, the wolves will tear you to pieces."

"And what would you and your father do, if I took it? You can't get him into a tree. You can't build a big enough fire to frighten them. Please don't even talk about this matter, Snowbird. My mind's made up. I think the pack will stay here. They usually-God knows how-know who is helpless and who isn't. Maybe with the gun, you will be able to save your

"What's the chance of that?"

"You might-with one cartridgekill one of the devils; and the others -but you know how they devour their own dead. That might break their famine enough so that they'd hold off until I can get back. That's the prize

"And what if you don't get back?" He took her hand in one of his, and with the other he caressed, for a single moment, the lovely flesh of her throat. The love he had for her spoke from his eyes—such speech as no human vision could possibly mistake. Both of them were tingling and breathless with a great, sweet wonder.

those fangs tear softness, while you live," he told here "Never let that brave old man on the sled go to his death with the pack tearing at him. Cheat 'em, Snowbird! Beat 'em the last minute, if no other way remains! Show 'em who's boss, after all-of all this for-

"You mean-?" Her eyes widened. "I mean that you must only spend one of those three shells in fighting off the wolves. Save that till the moment you need it most. The other two must be saved-for something

She nodded, shuddering an instant at a menacing shadow that moved within 60 feet of the fire.

"Then goodby, Dan!" she told him. And she stretched up her arms. "The thing I said-that day on the hillside -doesn't hold any more.

His own arms encircled her, but he made no effort to claim her lips. Lennox watched them quietly; in this do with awkward snowshoes; but the moment of crisis not even pretending to look away. Dan shook his head to her entreating eyes. "It isn't just a kiss, darling," he told her soberly. "It goes deeper than that. It's a symbol, It was your word, too, and mine; and words can't be broken, things being as they are. Can't I make you under-

She nodded. His eyes burned, Perhaps she didn't understand, as far as actual functioning of the brain was concerned. But she reached up to him, as women-knowing life in the concrete rather than the abstracthave always reached up to men; and she dimly caught the gleam of some eternal principle and right behind his This strong man of the mountains had given his word, had been witness to her own promise to him and to herself, and a law that goes down to the roots of life prevented him from claiming the kiss.

Many times, since the world was new comfort—happiness—life itself been contingent on the breaking or a law. Yet in spite of what seemed common sense, even though no punish ment would forthcome if it were roken, the law has been kept. It was this way now. It wouldn't have been just a kiss such as boys and girls have always had in the moonlight. It meant the symbolic renunciation of the debt that Dan owed Cranston—a debt that in his mind might possibly go unpaid. which no weight of circumstance could make him renounce

His longing for her lips pulled at the roots of him. But by the laws of his being he couldn't claim them until the debt incurred on the hillside, months ago, had been paid; to take

of his resolve to carry the issue that led him, to weaken him, by bending now, for the test to come. He the deep wells of the spirit. Common sense can't reveal how the holy man keeps strong the spirit by denying the flesh. It goes too deep for that. Dan

kept to his consecration. He did, however, kiss her hands and he kissed the tears out of her eyes. Then he turned into the darkness and broke through the ring of

#### CHAPTER III.

Dan Failing was never more thankful for his unerring sense of direction. He struck off at a forty-five-degree angle between their late course and a direct road to the river, and he kept it as if by a surveyor's line. All the old devices of the wilderness-the ridge on ridge that looked just alike. inclines that to the casual eye looked like downward slopes, streams that vanished beneath the snow, and the snow-mist blowing across the face of avail landmarks-could against him. A half dozen of the wolves followed

him at first. But perhaps their fierce eyes marked his long stride and his powerful body, and decided that their better chance was with the helpless man and the girl beside the flickering ire. They turned back, one by one. Dan kept straight on and in two hours crossed Cranston's trail. He didn't doubt but that he would find Cran-ston in his camp, if he found the camp at all. The man had certainly returned to it immediately after setting fire to the buildings, if for no other reason than for food. It isn't well o be abroad on the wintry mountains without a supply of food; and Cranton would certainly know this fact. Dan didn't know when a rifle bullet from some camp in the thickets would put an abrupt end to his advance. The brush grew high by the river, the elevation was considerably lower, and

across the moonlit snow, it would give him the most savage joy to open fire upon him with his rifle. Dan's keen eyes searched the thickets, and particularly they watched the sky line for a faint glare that might

there might be one hundred camps out of the sight of the casual wayfarer.

If Cranston should see him, mushing

silently. It wasn't an easy thing to river drowned the little noise that he made. He tried to take advantage of the shelter of the thickets and the trees. Then, at the base of a little ridge, he came to a sudden halt.

He had estimated just right. Not two hundred yards distant, a camp fire flickered and glowed in the shel ter of a great log. He saw it, by the most astounding good fortune, through a little rift in the trees. Ten feet on either side, and it was obscured.

He lost no time. He did not know when the wolves about Snowbird's camp would lose the last of their cowardice. Yet he knew he must keep a tight grip on his self-control and not let the necessity of haste cost him his victory. He crept forward, step by step, placing his snowshoes with consummate care. When he was one hundred yards distant he saw that Cranston's camp was situated beside a little stream that flowed into the

river and that-like the mountaineer he was-he had built a large lean-to reinforced with snowbanks. The fire burned at its opening. Cranston was not in sight; either he was absent from camp or asleep in his lean-to. The latter seemed the more likely. Dan made a wide detour, coming in

about thirty yards behind the construc tion. Still he moved with incredible caution. Never in his life had he pos sessed a greater mastery over his own nerves. His heart leaped somewhat fast in his own breast; but this was the only wasted motion. It isn't easy to advance through such thickets with out ever a misstep, without the rustle of a branch or the crack of a twig. Certain of the wild creatures find i

easy; but men have forgotten how in

It is hardly a human quality, and a spectator would have found a rather lithe motions, the passionless face, the hands that didn't shake at all. Bu were no spectators-unless the little band of wolves, stragglers from the pack that had gathered on the hills

behind-watched with lighted eyes. Dan went down at full length upor the snow and softly removed his snow shoes. They would be only an impediment in the close work that was sure to follow. He slid along the snow crust, clear to the mouth of the lean-to.

The moonlight poured through and showed the interior with rather resprawled, half-sitting, half-lying on a tree-bough pallet near the rear wall. There was not the slightest doubt of the man's wakefulness. Dan heard him stir, and once—as if at the memory of his deed of the day before-he cursed in a savage whisper. Although he was facing the opening of the leanto, he was wholly unaware of Dan's presence. The latter had thrust his head at the side of the opening, and it was in shadow. Cranston seemed to be watching the great, white snow fields that lay in front, and for a moment Dan was at loss to explain this seeming vigil. Then he understood. The white field before him was part of the long ridge that the three of them would pass on their way to the valleys. Cranston had evidently anticipated that the girl and the man would attempt to march out-even if he hadn't guessed they would try to take the helpless Lennox with themand he wished to be prepared for emergencies. There might be sport to have with Dan, unarmed as he was. And his eyes were full of strange con jectures in regard to Snowbird. Both would be exhausted now and helpless-

Dan's eyes encompassed the room the piles of provisions heaped against the wall, the snow shoes beside the pallet, but most of all he wished to Cranston's rifle. Success or failure hung on that. He couldn't find it at first. Then he saw the glitter of its barrel in the moonlightleaning against a grub box possibly six feet from Cranston and 10 from

His heart leaped. The best he had oped for-for the sake of Snowbird, not himself-was that he would be nearer to the gun than Cranston and would be able to seize it first. But conditions could be greatly worse than they were. If Cranston had actually nad the weapon in his hands, the odds of battle would have been frightfully against Dan. It takes a certain length of time to seize, swing, and aim a rifle: and Dan felt that while he would be unable to reach it himself, Cranston could not procure it either, without giving Dan an opportunity to leap upon him. In all his dreams, through the months of preparation, he had pictured it thus. It was the test at last

The gun might be loaded, and stillin these days of safety devices-un ready to fire; and the loss of a fraction of a second might enable Cranston to reach his knife. Thus Dan gether and trusting-as he had most desired-to a battle of hands. And he wanted both hands free when he made

If Dan had been erect upon his feet, his course would have been an immediate leap on the shoulders of his adversary, running the risk of Cranston reaching his hunting knife in time. But the second that he would require to get to his feet would entirely offset this advantage. Cranston could spring up, too. So he did the next most disrming thing.

He sprang up and strode into the

(TO BE CONTINUED.)

SHOWED SKILL AS ENGINEERS Ancients Did Remarkable Work Con sidering the Limited Mechanical Means at Hand.

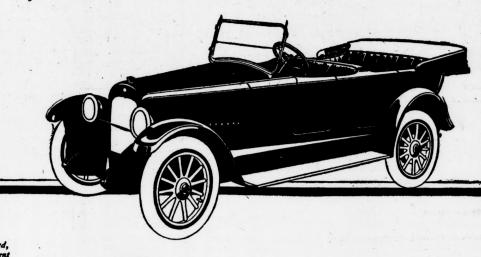

That ancient Greek and Roman engineers were ingenious as well as skillful is proved by the works that are still extant, for instance when the Eupalinos, island of Samos, waterworks mentioned by Herodotus were constructed in the middle of the Sixth century B. C., a tunnel about one mile ong was driven through the Kastro mountain, certainly a respectable achievement when one considers the limited mechanical means at the disposal of the builders. From the books of the Alexandrian mathematician Heron, one sees that ancient engineers knew how to figure beforehand the direction of a tunnel. The fine medical instruments, of which many have been excavated, give evidence of high me chanical skill. Ancient instrument makers manufactured clepsydras (water clocks) that could be carried in pockets and devices used by Herophilos to measure the temperature of patients. The present-day slot machine and taximeter are imitations of similar ancient inventions. Even to ballistic war machines ancient people applied ideas which play an important part in modern warfare-the "polybon" being in a certain meaning, the predecessor of our repeating arms, and the "monankon," of the mine thrower.

#### WHY DRUGGISTS RECOMMEND SWAMP-ROOT

For many years druggists have watched with much interest the remarkable record maintained by Dr. Kilmer's Swamp-Root, the great kidney, liver and bladder medi-

It is a physician's prescription. Swamp-Root is a strengthening medi-ine. It helps the kidneys, liver and bladder do the work nature intended they bould do.

Swamp-Root has stood the test of years. It is sold by all druggists on its merit and it should help you. No other kidney medicine has so many friends.

Be sure to get Swamp-Root and start

treatment at once.

However, if you wish first to test this great preparation send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing be sure and mention this paper.—Adv.

Opossums Instead of Cats. A writer in a nature publication says: "I kept a pair of opossums in the cellar of my home. One night when all was still I was surprised to hear grunts coming up from the cel-I had not known that opossums grunted like pigs. These opossum lived in the cellar nearly all winter. I am sure they scared the rats away, es no more rat signs were noticed. I fed them chicken heads, apples, sweet

Catarrh Can Be Cured Catarrh is a local disease greatly influenced by constitutional conditions. It therefore requires constitutional treatment. HALL'S CATARRH MEDICINE is taken internally and acts through the Blood on the Mucous Surfaces of the System. HALL'S CATARRH MEDICINE destroys the foundation of the disease, gives the patient strength by improving the general health and assists acture in doing its work.

All Druggists. Circulars free.

BIBLE TEACHINGS ABOUT EDU-CATION.

LESSON TEXT-Deut, 6:4-9; Prov. 8:13-GOLDEN TEXT-Wisdom is the princi-

pal thing: therefore get wisdo REFERENCE MATERIAL-Prov. 1:7-9; 4:1-13; Col. 2:3; Jas. 1:5; II Pet. 1:5. PRIMARY TOPIC—The Boy Jesus With

JUNIOR TOPIC—Pleasing God in 8 INTERMEDIATE AND SENIOR TOPIC

The Value of an Education.

YOUNG PEOPLE AND ADULT TOPIC

Making Education Christian.

1. The Excellency of Wisdom (Prov. 3:13-18).

Let no man confuse this "wisdom with the so-called wisdom resulting from an education in the arts, sciences and philosophy taught in the modern colleges and universities. The way to have this in its true sense is to get it from the Bible, God's revealed Word (Psa. 119:98-100). Wisdom personified means Christ (Prov. 8). All real wisdom leads to Christ, who is made unto us wisdom, righteousness, and sanctification (I Cor. 1:30). Wisdom is desirable because: 1. Of its inherent qualities (vv. 13-

15). (1) "Better than the merchandise of silver and the gain of gold" (v. 14). Men set great value upon these, but they are corruptible and shall soon pass away. (2) "More precious than rubies" (v. 15). Though among the most valuable among the precious stones, the ruby is of secondary value when compared with the wisdom of God. (3) Of immeasurable value (v. 15). The best things that the human heart can desire are not worthy to compare in value unto wis-2. It ministers to our earthly well

fare (vv. 16-18). (1) "Length of days is in her right hand" (v. 16). Godli-ness tends to long life. (2) "In her left hand riches and honor" (v. 16). "Riches and honor" may not always be according to the world's standard. (3) "Her ways are ways of pleasantness" (v. 17). The notion that the life of the Christian is hard and that pleasure does not enter into his experience is all wrong. The way of the transgressor is hard (Prov. 13:15). Godliness is profitable unto all things, having the promise of the life that nov is and of that which is to come (I Tim. 4:8). (4) "All her paths are peace" (v. 17). There is no peace to the wicked. "The wicked are like the troubled sea when it cannot rest, whos waters cast up mire and dirt (Isa. 57:20, 21). (5) "She is a tree of life to them that lay hold upon her" (v. 18). Those who eat of the tree of life, Christ, have eternal life (Gen. 3:22; ch. John 6:63. (6) "Happy is everyone that retaineth her" (v. 18). The only true happiness that can be had is in laying hold on wisdom in

II. Israel's Responsibility With Reference to the Statutes of the Lord (Deut. 6:4-9).

1. Central truths to be taught (vv. 4, 5). (1) Unity of God. "The Lord our God is one Lord." This was a testimony against the polytheism of that day. He is God alone, therefore to worship another is sin. (2) Man's supreme obligation (v. 5). God should be loved with all the heart, soul, and might, because He is God alone and supreme. The one who is truly wise will make God first in everything in his life, first in business, first in pleasure, first in education, etc.

2. How these truths are to be kept alive (vv. 6-9). The place for God's Word is in the heart. In order that it may be in the heart (1) "teach dillgently to thy children" (v. 7). The most important part of a child's education is that given in the Word of God. (2) Talk of them in the home (v. 7). How blessed is that home where God's Word is the topic of conversation. (3) Talk of them when walking with our children and friends (4) Talk of them when re tiring for the night (v. 7). The last thing upon which the mind should rest before going to sleep should be God and His truth. (5) Talk of them when rising in the morning (v. 7). How fitting that God should speak to us the first thing when we awake. (6) Bind them upon thine hand (v. 8). This was literally done by the Jews. (7) Write them upon the posts of the house and on the gates (v. 8). III. The Growth of Jesus (Luke

2:52). It should be borne in mind that Christ's growth was not the result of education, but the normal unfolding of His human nature. His growth was harmonious.

1. Bodily stature. Being really human, His bodily size and strength increased. What wonderful condescension that God should take our nature and thus pass through the stages of physical development common to man!

2. Increased in wisdom. His mental equipment enlarged as any normal human being. His fountain of knowledge increased as He came in contact with men and the world.

3. In favor with God and man. His innate perfection and beauty more and more expressed itself as His human nature expanded.

Animosity Grows Into III Will. "Resist beginnings." You cannot curb the power of the river; choke its source. You cannot arrest the fury of the conflagration; put out the spark. It is almost impossible to check hatreds that have been allowed free course; never let them begin. An animosity will sometimes spring up before one knows it; make its life a brief one. Animosity grows into ill will and malignity and rancor, and these are far more hurtful to our selves than to those against whom they are directed. Subdue them by the spirit of Christ, without which we are one of His.-Watchman-Exeminer.

### For the Magnificent Hour

Many materials are called upon to and overdrape of face are both pointed make the gay or gorgeous gowns ed at the bottom. The bodice is simply in which women emerge from the restraint of a daylight world into an- handsome sash with embroidered ends other that invites them to indulge their love of splendor. They have often been likened to gay butterflies, its longest reaches the insten. and never more appropriately than now. Fabrics and colors are like these

winged jewels. Gowns of lace, over silk or satin, in colors or in white or black, continue to appeal to the greatest number of people. The metallic laces, and laces dyed to match the lovely silks with which they are combined, justify their reappearance by the beauty of the gowns they make.

Two handsome models for the dinner dance or other occasions are shown in the picture, made over sath underslips. The dress at the left is lovely in brown lace over brown satin, and sure also of finding favor in either black or cream color. The underskirt ed at the bottom. The bodice is simply draped and sleeveless and a very and girdle is featured with bouffant bows and long ends. The overskirt at

In the dress at the right, lace over satin with beads finishing the edges of the bodice and short sleeves, preserves a long line, but ac complishes a ripple in the lace over skirt. A metallic ribbon set in across the sides and back makes a clever management of the waist line without defining it. It is finished at each side with a rosette and veiled with tulle which finishes its brief but interesting career in short bouffant loops at the right side toward the back.

Kimono Bathing Suit.

A Japanese parasol generally completes the kimono bathing costume. The effect of this bathing suit is somewhat like pajamas. Some have likened it to the wearing apparel of the coolie. The trousers are short and oose and the tunic long with a sash about the waist.

Spanish Effects.

in certain models, as, for instance, one black lace frock, which has the wide bateau neck, long tight sleeves ending in mits and a cluster of col

ored flowers posed at the waistline.

High-Crown Hats. A tendency to high crowns is evidenced in some of the imported millinery displays. Morning and street hats are small, while for afternoon There is a marked prevalence of and formal wear the models are ex-eriod styles this season. There is tremely large, some measuring 10 tremely large,

# FOR THE COOL SPRING DAYS

Forced Out of Favor.

Dropped Waistline, Princess Bodice and Sash Combination Has Been Revived.

Plaits and the one-piece dress have been condemned to die by the design ers, but the fashionable public is buy ing and wearing both of these conveni ences. For tenacity of existence plaits and one-piece dresses are actually

There is a subtle difference, how ever, in the manner of fashloning both the plaited skirt and the one-piece dress, for the new models.

Side and kilt plaits are proper for skirts. The accordion plait simply will not be squeezed out of the limelight. But a firm lid has ben put down on the box plait.

The one-piece dress is cut on more graceful and less exposing lines. It is made, too, as a mere background for veritable panoramas of embroidery and of beading. By the time a suc-cessful modiste has done her cleverest to a one-piece dress of blue serge the garment stands forth a matchless piece of embroidery or of beading. This embellishment may be of self or contrasting color. Quilting appears as a trimming, but

reserved rather for the satins. It is liked best, too, on coats or wraps.

In choosing a plaited skirt the canny buyer notes that the plaited skirt that is most recherche is the skirt in which the plaits reserve their spring intil they have fallen below the hip

Garment Has High Collar and One Sided Jabot Effect-Egyptian Influence in Embroidery.

The Directoire, mentioned as the leading influence in spring millinery, has also given its name to a most charming vestee. It has a high collar and a one-sided jabot effect and will lend an air of distinction to any tailored costume.

The Egyptian influence is also shown in the embroidery used to trim organdie guimpes and sets. Both the designs and the colors used, red, blue, green, yellow and black, recall to mind those long vanished people.

Straight collars with cuffs to match are leaders among the lace sets while round ones are also seen. Pique, which has not been seen for several years, is coming back into use. It is shown in round collars on the Peter Pan or der and which are often embroidered

#### DRAG DISABLED CARS WITH RIGID TOW-BAR **BIG IMPORTANCE**

Is to Hold Car When Standing and

Secondarily to Use if Other

Brake Gives Way,

By H. CLIFFORD BROKAW.

brakes are the best form of accident

insurance you can have. This indi-

cates the relative importance of the

two car features. You might have

the highest type of engine with un-

limited power under the hood, but if

you haven't also some means of curb-

ing your high stepper and tethering it

at will you are in for it. "Whoa" won't stop it either. You might bet-

ter be driving an untamed broncho of

the plains. The engine will get you

there, it is true, but if there be no

means of stopping you may go too

The car has two sets of brakes-

emphasizing the importance—and oc-

casionally a car has more. The emer-

gency or hand brake consists of a

brake band operating within a drum

on each rear wheel, connected by rods

and levers to the hand lever, which

has a ratchet and pawl so that it may

be locked in position. This brake primarily is to hold the car when

standing and secondarily to use in

running if the other brake gives way

Operation of Foot Brake.

with a spring to release it when pres-

sure on the pedal is removed, and is

connected by other rods and levers to

brake bands operating on the outside

of the rear wheel drums, or occasion

ally upon a separate drum on the pro-

peller shaft. The latter gives greater

breaking power, because of the rear

axle gearing leverage back of the

brake, and the second drum helps pre-

vent overheating on long hills. But

this type brake does put a severe

Both brakes should be kept in such

condition that either will stop the car

quickly. Do not let one set remain

out of order just because you know

the other is all right. The other

Brake bands are lined with non-

burning friction material, usually an

ashestos fabric, fastened to the steel bands by copper rivets, the heads of

which are counter-sunk deep into the

lining, to keep the heads from contact with the drum. If the lining is

allowed to wear thin the copper rivet

heads score the drum into shallow

grooves, lessening the braking power.

Such must be turned true on a lathe

if they are to be worth much for

Renew Brake Lining.

Equally important is the renewal of

the brake lining before it is worn thin

enough to expose the rivets to friction.

Better have this done at the service

station. It is a particular and tedious

job. It is possible, however, to get the

right size linings and proper rivets at

almost any supply house. Remove the

brake bands, punch out the old rivets,

noticing how they were put in, and go

must be countersunk deep into the

lining and every rivet set up tight. It

requires patience but can be done by

The brake lining is one place where

lubrication is not desirable, but every

other place on the brake and linkage

where there is motion should be lubri-

cated regularly according to the man-

ufacturer's lubrication chart, and be

cleaned likewise. There is consider

able wear to the clevises and pins;

# MRS. REIFENSTEIN, AGED 67, GAINS 25 POUNDS

Declares She Would Like To Put a Bottle Of Tanlac In The Hands Of Every Sick Man, Woman and Child In This Country - Never Saw Its Equal.

"I am sixty-seven years of age, but in all my experience I have never known a medicine like Tanlac. Think of it! At my age to gain twenty-five pounds in weight, but that is just what I have done," said Mrs. Emma Reifenstein, of No. 337 Webster avenue, Syracuse, N. Y.

"If I had it in my power," she con tinued, "I would put a bottle of Tanlac in the home of every sick man, woman and child in this country, for I know what this wonderful medicine would do for them. For almost two years I was almost a nervous wreck. I did not dare to leave the house or even go up town unless my husband went with me. I was afraid to ever cross the street and had a feeling of dread all of the time.

"My stomach was weak and easily upset. For days at a time I would go in its praise." without solid food. I could not rest Mr. J. Reif at night to do any good and felt tired on his wife's statement, said: "Yes, and worn out all of the time. Some her recovery has been a happy surdays I could hardly drag myself prise to us all. A few weeks ago I across the room and was so weak and had no idea she would be able to pull miserable I was ready to give up.

"My health is fine now and I cat health than I have ever seen her and anything I want and never have a the credit is due to Tanlac. We have touch of indigestion. I have never slept been married fifty-two years today better than I do now. My recovery is and I don't believe I have ever seen the talk of our neighborhood, as it was her looking any better." generally believed I could not last Tanlac is sold by leading druggists but a few weeks longer. This grand everywhere.—Adv.
